ADDENDUM NO. TWO

Date: June 13, 2013

RFP No. 13-0605

RFP Title: Fire Protection Systems Inspection, Testing and Maintenance

It is the vendor's responsibility to ensure their receipt of all addenda, and to clearly acknowledge all addenda within their initial bid or proposal response. Acknowledgement may be confirmed either by inclusion of a signed copy of this addendum with the initial bid or proposal response, or by completion and return of the addendum acknowledgement section of the solicitation. Failure to acknowledge each addendum may prevent the bid or proposal from being considered for award. Please include this Addendum in the proposal, as it contains an additional pricing form.

This addendum does not change the date for receipt of bids or proposals.

The purpose of this addendum is to: 1) amend the RFP document as noted, 2) provide an additional pricing form for a hazardous material storage shed not included on the original RFP pricing form, 3) address additional questions received from vendors, and 4) provide information concerning building drawings.

1) Amendment to RFP Document:

Section Two, Statement of Work, Technical Requirements, 1. Initial Repair of Fire Protection Systems, letter a) states, "Within forty-five (45) days after a notice to proceed has been issued, the Contractor shall provide to the Project Manager via e-mail in a PDF format, a detailed individual report for each facility. This report shall identify any items that need to be repaired or replaced to bring each fire protection system (**fire sprinkler, fire alarm, fire extinguishers, and fire suppression**) into a fully functional condition that meets all current applicable NFPA, federal, state, and local code requirements. Along with the report, a proposal shall be provided with unit costs for any items that need to be replaced. Both the report and the proposal shall be broken down by location, and all costs shall be derived from the fee schedule listed in the pricing section. The report shall contain justification for the parts or service being considered to be replaced."

This section is hereby amended to exclude fire extinguishers from this forty-five day requirement. As discussed in the June 12, 2013 pre-proposal conference, the fire extinguisher inspections are fairly current and up-to-date. Therefore, the fire extinguisher inspections will not be required to be completed within forty-five days after the notice to proceed is issued.

2) Additional Location - Pricing Required:

One location was inadvertently left off the pricing form included in Section 4 of the original RFP document. Please complete the following and submit in your proposal at the end of the original RFP pricing section. Location description: Hazardous Material Storage Shed; address/location: Solid Waste, 13100 County Landfill Road, Tavares. Insert pricing below and submit in proposal.

TYPE OF INSPECTION	Estimated Quantity	UOM	UNIT PRICE	TOTAL PRICE
Ansul System				
Inspection Services (per year as stated in SOW General Information Pricing Section 3, letter C, page 17)	1	YR	\$	\$
Total Hazardous Material Storage Shed (Solid Waste)				\$

3) **Questions and Answers:**

Question 1: Is there a list of how many risers per building for the fire sprinklers? I was looking at the inspection reports and it doesn't say how many risers per building; just wondering if there is a count of how many.

Answer 1: No, Lake County does not have a list showing the number of risers for each building. The building drawings (CD available upon request), should indicate how many risers there are for each building. If a particular drawing does not show this information, please contact dvillinis@lakecountyfl.gov and we will attempt to provide the count.

Question 2: Is it possible to get the last years' inspection reports for the fire alarm systems, so we can properly bid this opportunity? I have building drawings, but some do not show any fire alarm devices, and some are hard to read.

Answer 2: Please see the "Additional Information" link that has been posted in conjunction with this RFP on the Lake County website for information on previous inspections (including fire alarms, titled "Fire Alarm," dated 6/11/13).

4) **Additional Information Concerning Building Drawings:**

Addendum One, issued on June 4, 2013, indicated that drawings of the larger buildings within the County had been uploaded to the website in conjunction with the RFP and Addendum One. These drawings have been removed from the site and are available on a CD. Vendors may request a copy of the CD, which must be returned to Lake County Procurement Office with the vendor's proposal. If vendor decides not to submit a proposal, the CD must still be returned to Procurement by 3:00 p.m. on June 26, 2013. You may request a CD in person (Procurement Office, 315 W. Main St., Tavares, FL, or by email (dvillinis@lakecountyfl.gov.) You will be required to complete and submit a receipt form before a CD will be given to you.
